Technology Days on 26 and 27 September 2021 at Porzellanikon

This year, Porzellanikon - Staatliches Museum für Porzellan, Selb, will once again offer all ambitious hobbyists, tinkerers and explorers a large playground for all kinds of technical experiments over two days. On Sunday, 26 September 2021, families are especially welcome. From 11 a.m. to 5 p.m., young and old can let off steam at a wide variety of hands-on stations: whether it's building rockets, painting with light, programming robots or building a large chain reaction - at the technology days, all future master builders or engineers will find an opportunity to realise their ideas or try out new things. Crazy and creative constructions are definitely welcome! The BayernLab partners will bring programmable Lego robots and the Chamber of Crafts (HWK) for Upper Franconia will give visitors the opportunity to dive into virtual reality and weld or paint. A particularly popular and spectacular activity is rocket building, where participants can try their hand at being a rocket engineer and shoot a small Selbling high into the sky and hopefully bring it back to earth unharmed. On Monday, 27 September, various workshops for school classes will be offered from 8 a.m. to 1 p.m.
